

CAR RULES 2023:

We have sought out to simplify the rules for the 2023 event. We found last year that weight added to some cars helped equalize the competition. This year's rules will be kept simple. We will utilize Bridgeport Motorsports Park Street Stock rules as our "BASE" rules. If you comply to them you are good to go at that set weight.

HOME TRACK RULES

If you are coming from another track, you must contact us and state the track, the division name, and a link to the rules package you follow at your track. We will sort through your rules and determine anything you may have to adjust or remove from your car. We will then let you know what weight you must run at in order to not have an OVER or UNDER advantage of the base line rules package cars.

HOME TRACK RULES, EXCEPT THE FOLLOWING

Engines:

1. **360 MAX Cu. In.**
